Human Development is about:

**LIVING CONDITIONS**
- Human development is a concept of development that has to do with creation and improvement of living conditions.

**DEVELOPMENT PROCESSES**
- People should be in the centre of development processes.

**LIFE WITH DIGNITY**
- Human development fights inequalities and promotes a life with dignity for all people worldwide regardless of their origin, gender, and skin color.

**SUSTAINABILITY**
- Sustainability is crucial for human development. Population growth results in higher consumption which damages the living environment beyond its capacities.

**LONG AND HEALTHY LIFE**
- Human development expands people's choices to lead healthy lives.

**CHANGE OF THE CONSUMPTION BEHAVIOUR**
- People should change their consumption behaviour. Only if we change our consumption behaviour, we and our children will have a prosperous future!
